

Information sheet on the registration and accreditation of a study performance in the module *Methods and Concepts*

The approval of a course (page 1) is only used for courses which are not offered by the Faculty of Chemistry and Pharmacy. It is used to prove that the responsible program coordinator approved the accreditation of the achievement. The approval is a kind of surety for you that the ECTS can be credited. This page of the form will be submitted to the program coordination.

Courses from the Faculty of Chemistry and Pharmacy and courses which you can find in the area *Methods and Concepts* in your study planner in HISinOne don't need to be approved before. Please do only fill in the second page.

On the accreditation-page (page 2), the examiner has to confirm that you passed the study achievement. Furthermore, the dean of studies has to confirm that the achievement can be credited and how many ECTS you will get.

Please submit this second page to get the signature to the program coordination. We will forward it to the examinations office afterwards.

Study performances in the module *Methods and Concepts* can only be credited with this form and don't need to be registered in HISinOne.

**This page is only necessary for courses outside the Faculty of Chemistry and Pharmacy!
Please submit this page to the program coordination, Hebelstr. 27.**

M.Sc. Chemistry
