

Information sheet on the registration and accreditation of a study performance in the module *Methods and Concepts*

The approval of a course (page 1) is only used for courses which are not offered by the Faculty of Chemistry and Pharmacy. It is used to prove that the responsible program coordinator approved the accreditation of the achievement. The approval is a kind of surety for you that the ECTS can be credited. This page of the form will not be submitted at the examination's office.

Internal courses and courses which you can find in the area *Methods and Concepts* in your study planner in HISinOne don't need to be approved before.

On the accreditation-page (page 2), the examiner has to confirm that you passed the study achievement. Furthermore, the program coordinator has to confirm that the achievement can be credited and how many ECTS you will get.

Please submit this second page at the examination's office after having passed the study performance.

Please note:

If you want to take part in the modules „Fundamentals of Resilience“, „Solar Energy“ or „Energy Storage“, please register for the study performances in HISinOne as well!

M.Sc. Sustainable Materials – Crystalline Materials

Approval of a course in the module *Methods and Concepts*

lecture practical course seminar other:

Student's details:

Surname, Name: _____

Matriculation number: _____

Email: _____

Name of the Course: _____
